Boubker CHEYOUKH

Data & AI Engineer | Full Stack Background

Casablanca, Maroc | b.cheyoukh@hestim.ma | 0644435752 | Portfolio | LinkedIn

PROFILE

4th-year Engineering student in Computer Science, specializing in Artificial Intelligence.
Skilled in software development, data analysis, and intelligent systems, with a strong interest in AI, machine learning, and cybersecurity fundamentals.
Passionate about building impactful, data-driven solutions using Python, Java, and modern technologies.

PROFESSIONAL EXPERIENCE

Software Development Intern — ATM VIEW *Juin – Août 2025*

- Developed Cash Management features and business modules, including bug fixing and system improvements
- *Technologies:* C# (.NET), HTML, CSS, JavaScript

Freelance Developer — Sports Management Application *2025*

- Designed and developed a management solution (members, subscriptions, sessions, payments)

Freelance Developer — Restaurant Management Platform *2024*

- Developed a management platform (reservations, orders, inventory) — Java EE, Hibernate, JavaScript

EDUCATION

Cycle Ingénieur d'État — Génie Informatique, Spécialité IA *En cours*
HESTIM, Casablanca

Licence Pro — Développement Internet & Mobile *(ULCO) — Double diplomation avec SupTechnologie* *2025*
Mention : Très Bien — 180 ECTS

Licence MIAGE — Informatique Appliquée à la Gestion des Entreprises *2025*
École Supérieure SupTechnologie, Casablanca

Baccalauréat Scientifique — Filière Sciences Physiques *2022*
Lycée Anouar Al Madina, Casablanca

ACADEMIC PROJECTS

Data Warehouse & BI — Healthcare Sector *(SQL Server | SSIS | SSAS | Power BI | Python – K-means)*

- Designed a data warehouse (ETL, OLAP modeling) and built decision-making dashboards

PerfuSafe — Medical IoT & Edge AI (TinyML) *(Python | FastAPI | scikit-learn | Streamlit | MQTT | Next.js)*

- Real-time anomaly detection on infusion data with embedded deployment (Raspberry Pi)

Energy Analysis & Forecasting (CRISP-DM) *(Python | pandas | Prophet | Isolation Forest | scikit-learn)*

- Time-series modeling and anomaly detection for energy consumption

Heart Disease Prediction *(Python | scikit-learn | PCA | Logistic Regression | Streamlit)*

- Developed a predictive model with interactive visualization

ShadowDay — AI-Based Professional Immersion Platform *(Express.js | PostgreSQL | React (TypeScript) | Python | WebRTC)*

- Intelligent matching platform with real-time communication (video integration)

Smart Waste Management — IoT & Smart City *(ESP32 | LoRaWAN | ThingSpeak | React)*

- Smart waste management system using connected sensors and long-range communication

Rakeb — Ride-Sharing & Transport Application *(Flutter | Firebase | real-time geolocation)*

- Cross-platform mobile app with GPS tracking and real-time interaction

Online Exam Platform *(Spring Boot | Angular | MySQL | Secure REST API)*

- Exam management system with timer, auto-grading, and teacher dashboard

MultiAgents Medical Diagnostic System — AI Agentic System *(LangGraph | FastAPI | Angular | MCP)*

- Multi-agent medical diagnostic system with LangGraph orchestration, human-in-the-loop validation, and structured report generation
- Full-stack architecture (REST API, specialized agents, Angular interface) with real-time consultation management and PDF export

TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript, PHP, Kotlin
- **AI & Data Science:** Machine Learning (K-means, regression, classification), NLP, Pandas, NumPy, LLM/RAG (basics)
- **Databases:** MySQL, PostgreSQL, SQL Server, SQLite, Firebase (NoSQL)
- **Data & BI:** Power BI, SSIS, SSAS, Data Warehousing (OLAP)
- **Tools:** Git, REST APIs, MVC/REST Architecture, WebRTC, Drizzle ORM

SOFT SKILLS

- **Responsibility • Teamwork • Autonomy • Adaptability**

CERTIFICATIONS

Machine Learning with Python (IBM) • Python for Data Science, AI & Development (IBM) • Exploratory Data Analysis for ML (IBM)
HCIA Cloud Computing V5.5 (Huawei ICT) • Cisco CCNA 1 & 2

LANGUAGES

Arabic: Native | French: Advanced | English: Professional
